My research lies on the application of machine learning, neuroimaging and genetics in brain aging and disorders. Specifically, using machine learning, neuroimaging and genomics, I aim to dissect disease heterogeneity in various brain disorders. Furthermore, my research aims to bridge the knowledge in imaging and genetics, in order to better understand the underlying biological processes. In my career, I have devoted myself to open neuroscience and reproducible machine learning.

EDUCATION

2015-2019 PhD in Computer Science

Sorbonne University, Paris, France

2012-2015 Master in Electronic Engineering

Beihang University, Beijing, China

2008-2012 Bachelor in Electronic Engineering

Beihang University, Beijing, China

RESEARCH SKILLS

Programming languages Python, R, Bash, Matlab

Software and frameworks Machine learning (Scikit-learn, TensorFlow, Pytorch), Neuroimaging (Nipype, FreeSurfer, FSL,

ANTs, SPM), Genome (Plink, PRSice, GCTA, LDSC)

Scientific writing Microsoft Word, FIEX, Overleaf, Inkscape

Development tools PyCharm, RStudio, GitHub

Others HTML, CSS

Research Experience

August 2019 August 2021

Postdoctoral fellow

CBICA lab, University of Pennsylvania, USA

- > Postdoctoral research working with Christos Davatzikos
- > Focus on dissecting heterogeneity of brain diseases and data-driven dimensionality reduction techniques

Neuroimaging | Machine learning

October 2015

012 | 5111

June 2019

ARAMIS lab, Sorbonne University, INRIA, CNRS, INSERM, Paris, France

- > Four-year PhD training under the supervision of Olivier Colliot and Anne Bertrand
- > Software developer for Clinica
- > PhD dissertation: Structural and microstructural neuroimaging for diagnosis and tracking of neurodegenerative diseases

Neurodegenerative disease Neuroimaging Machine learning

July 2017

Visiting scholar

October 2017

CMIC lab, University College London (UCL), London, UK

- > Collaboration with Daniel Alexander and Hui Zhang
- > Collaboration on a NODDI paper: Neurite density is reduced in the presymptomatic phase of C9orf72 disease

FTLD Clinical study Neuroimaging
