## Junhao **Wen** PhD

@ junhao.wen89@gmail.com

Personal page:junhaowen.com

 $\square$  Google Scholar:https://scholar.google.com/citations?user=4Wq $_FukAAAJhl=en$ 

☑ GitHub:https://github.com/anbai106

My overarching research interests include methodology development and application of machine learning, neuroimaging, and genetics in brain aging and disorders. My grand vision of AI in medicine is that AI sees what we cannot see as human beings. With rigorous and reproducible evaluation, AI has great potential in clinical translation. Throughout my career, I have been a practitioner of open neuroscience and Al.

#### **EDUCATION**

2015-2019 PhD in Computer Science

Sorbonne University, Paris, France

Master in Electronic Engineering 2012-2015

Beihang University, Beijing, China

Bachelor in Electronic Engineering 2008-2012

Beihang University, Beijing, China

# RESEARCH SKILLS

Python, R, Bash, Matlab Programming languages

Machine learning (Scikit-learn, TensorFlow, Pytorch), Neuroimaging (Nipype, FreeSurfer, FSL, Software and frameworks

ANTs, SPM), **Genomics** (Plink, PRSice, GCTA, LDSC)

Scientific writing Microsoft Word, LTFX, Overleaf, Inkscape

Development tools PyCharm, RStudio, GitHub

> Others HTML, CSS

### RESEARCH EXPERIENCE

## August 2019 August 2021

#### Postdoctoral fellow

## CBICA lab, University of Pennsylvania, USA

- > Postdoctoral research working with Christos Davatzikos
- > Focus on dissecting heterogeneity of brain diseases and data-driven dimensionality reduction techniques

Neuroimaging Machine learning

#### October 2015

#### June 2019

#### ARAMIS lab, Sorbonne University, INRIA, CNRS, INSERM, Paris, France

- > Four-year PhD training under the supervision of Olivier Colliot and Anne Bertrand
- > Software developer for Clinica
- > PhD dissertation: Structural and microstructural neuroimaging for diagnosis and tracking of neurodegenerative diseases

Neurodegenerative disease Neuroimaging Machine learning

## July 2017

#### Visiting scholar

# October 2017

CMIC lab, University College London (UCL), London, UK

- > Collaboration with Daniel Alexander and Hui Zhang
- > Collaboration on a NODDI paper: Neurite density is reduced in the presymptomatic phase of C9orf72 disease

FTLD Clinical study Neuroimaging

#### A Papers in Peer reviewed Journals
